School Health Service

Year 7 Health Questionnaire

Dear Parent / Carer,

School nurses provide a valuable and accessible service to young people within a High School environment. As part of our continued school health surveillance programme, pupils will be offered the opportunity to complete a confidential questionnaire about their health in Year 7. The health questionnaire seeks information about general, physical and emotional health.

Following completion of their health questionnaire the school nurse may request to review the young person in school with their consent. Health questionnaire responses will be treated in the strictest of confidence and your son/daughter will be offered advice and support in response to their answers.

This may extend to a telephone call to you to share information, discuss concerns raised or to gain your consent to refer them onto other health services.

Please contact the school if you do not wish your child to take part in the year 7 health questionnaire.

Should you wish to discuss your son/daughters general, physical or emotional health your school nurse can be contacted on the above number.

Yours sincerely

SCHOOL NURSING TEAM.
