## Letter of advice from Public Health England for parents of Years 9 and 11 students at Brine Leas School

16<sup>th</sup> October 2020

For Parents of close contacts of COVID 19 in Years 9 and 11 at Brine Leas School

Dear Parent or Carer,

This morning, we have been made aware that we have two confirmed cases at Brine Leas School (Years 9 and 11).

We have followed the national guidance and have identified that your child has likely been in close contact with one of the confirmed cases by either:

- being in a class together and potentially sitting close to one of the individuals
- sharing a social area and potentially being near one of the individuals
- sharing a dining area and potentially sharing dining tables and facilities with one of the individuals

The assessment of these activities and the identification of potential and likely contact has been agreed by the advisor from Public Health England. The organisation of these activities was also discussed with the adviser and the arrangements confirmed as being compliant with the current guidance for schools.

***In line with the national guidance your child must stay at home and self-isolate until Monday 26<sup>th</sup> October 2020.***

If your child is well at the end of the period of self-isolation, then they can return to usual activities.

Other members of your household can continue normal activities provided your child does not develop symptoms within the 14-day self-isolation period.

I will be in touch with more specific information about next week's schooling for these year groups later today. Remote learning is already available via Microsoft Teams.

### **What to do if your child develops symptoms of COVID 19**

If your child develops symptoms of COVID-19, they should remain at home for at least 10 days from the date when their symptoms appeared. Anyone with symptoms will be eligible for testing and this can be arranged via <https://www.nhs.uk/ask-for-a-coronavirus-test> or by calling 119 .

People who do not have symptoms should not request a test unless this has been specifically requested by Public Health England or the local authority.

All other household members who remain well must stay at home and not leave the house for 14 days. This includes anyone in your 'Support Bubble'.

The 14-day period starts from the day when the first person in the house became ill.

Household members should not go to work, school or public areas and exercise should be taken within the home. If you require help with buying groceries, other shopping or picking up medication, or walking a dog, you should ask friends or family. Alternatively, you can order your shopping online and medication by phone or online.

Household members staying at home for 14 days will greatly reduce the overall amount of infection the household could pass on to others in the community

If you are able can, move any vulnerable individuals (such as the elderly and those with underlying health conditions) out of your home, to stay with friends or family for the duration of the home isolation period

### **Symptoms of COVID 19**

The most common symptoms of coronavirus (COVID-19) are recent onset of:

- new continuous cough and/or
- high temperature and/or
- a loss of, or change in, normal sense of taste or smell (anosmia)

**For most people, coronavirus (COVID-19) will be a mild illness.**

If your child does develop symptoms, you can seek advice from the nhs.uk website at <https://www.nhs.uk/conditions/coronavirus-covid-19/check-if-you-have-coronavirus->

[symptoms/](#). If you are concerned about your child's symptoms, or they are worsening you can seek advice from NHS 111 at <https://111.nhs.uk/> or by phoning 111.

### **How to stop COVID-19 spreading**

There are things you can do to help reduce the risk of you and anyone you live with getting ill with COVID-19

#### *Do*

- wash your hands with soap and water often – do this for at least 20 seconds
- use hand sanitiser gel if soap and water are not available
- wash your hands as soon as you get home
- cover your mouth and nose with a tissue or your sleeve (not your hands) when you cough or sneeze
- put used tissues in the bin immediately and wash your hands afterwards

### **Further Information**

Further information is available at
